

# OP19

## Optical patch panel - 19"

Optotec OP19 are patch panels made from sturdy steel plate in black color. They offer maximum modularity in the management of the cabinet patching optical fibres. The supporting structure can be pulled out to allow the implementation and maintenance of all internal terminations. The front is equipped with four interchangeable modules chosen by the user, with capacity adapters ST sx, SC sx, SC dx, FC, SMA, LC dx, MTRJ. In this way the user can freely compose the configuration of the front using only one drawer for different types of adapters. It may be noted that the small dimension of the drawer (19" 1unit) does not penalize the density mounting. In the configuration with four modules for 6 LC duplex can accommodate up to 48 fibres in a single drawer in only one unit. On the back of the drawer are four openings - two circular intended to receive the cable entries and two slotted intended to receive the splitter's cables. Optotec OP19 patch panel presents a wide range of accessories for the optimal organization of spliced fibres or terminators.

### KEY FEATURES AND BENEFITS

- Fixed support with removable frontal tray for ease access
- Modular front for 4-6 positions can accommodate up to 24 simplex or duplex adapters allowing total freedom of configuration
- High density mounting of upto 48 fibres in small dimensions
- Internal tray for 12 or 24 splicing with clips for optimal organization of the fibres

| OPTICAL PATCH PANEL | FIXING RACK | N° UNITS | DIMENSION (MM) |       |       | WEIGHT | COLOR |
|---------------------|-------------|----------|----------------|-------|-------|--------|-------|
|                     |             |          | HEIGHT         | WIDTH | DEPTH |        |       |
| OP19                | 19"         | 1        | 430            | 300   | 44    | 2 KG   | BLACK |
