

OXF

Optical Xconnect Frame

Optotec OXF are light metal frames designed to offer maximum modularity and flexibility. The OXF rack is the most compact, cost-saving solution on the market. It can be delivered in flat packaging to reduce shipping costs and for easy on-site assembly. Many configurations available (close, partially open or open frames).

The modular OXF design naturally allows installation in rows, back-to-back and stand-alone.

The OXF building blocks range includes modules and kits, which allow to assemble bespoke structures according to your needs. Thanks to this built-in flexibility, this product is suitable for different types of Central Office applications.

Together with Optotec panels, OXF racks have a capacity of up to 4,320 fibres in 45 units. The frames have an innovative and adaptable patch cable management area with the possibility of managing a standard patch cable length of 4 meters for each cross connection inside the rack. Completely pre-assembled solutions are available according to customer requirements to ensure saving time and costs on-site.

APPLICATIONS

- Management of OSP cables into subracks
- Management of ISP cables into subracks
- Management of fiber patch-cords

INSTALLATIONS

- Telecommunication Exchanges
- Central Offices
- Data Centers
- Equipment Rooms

KEY FEATURES AND BENEFITS

- Full front accessibility
- Maximum flexibility, modularity and compactness
- ETSI compliant with 19" rails mounting
- The feet installed in the base of the cabinet are adjustable
- Bend radius protection throughout the frame
