OBJECTS/ RATIONALE OF THE SCHEME

Rationale for demerger of the Demerged Undertaking from the Demerged Company into the Resulting Company

- (i) The Global Services Business and other business verticals of the Demerged Company have been commenced and nurtured over different periods of time. They are currently at different stages of growth and maturity with each having distinct market dynamics, geographic focus, strategy, capital requirements and investor interest. The Demerged Undertakings and the Remaining Undertaking have both achieved scale and experience to sustain business independently in terms of profitability, turnover, order book, customer profile, talent, etc. Hence, segregation of the Demerged Undertaking into a separate entity would enable focused managements to explore the potential business opportunities more effectively and efficiently in the respective business;
 - (a) The nature of opportunities, growth areas, risk and competition inherent in the Global Services Business is distinct from the Remaining Undertaking of the Demerged Company, since it is subject to distinct business cycle and market structure, necessitating different management approaches, focus and it is capable of attracting different set of investors, strategic partners, talent, lenders and other stakeholders.
 - (b) Further growth and expansion of the Global Services Business would require a differentiated strategy aligned to its industry specific risks, market dynamics and growth trajectory. Moreover, the Global Services Business has now reached a meaningful scale and will be able to benefit by becoming independently focused company.
 - (c) The Government of India's commitment to BharatNet phase three, which is a \$10 billion plus program, gives an opportunity to the Demerged Company to grow its core business, i.e. the Optical Network Business and also provides consequent opportunities for the Global Services Business. Similarly, the Demerged Company is seeing an acceleration on the 5G deployment front which is driving requirement for fiber roll-out for network. In light of the above, there is a need for the activities of the Global Services Business and the other businesses of the Demerged Company to be organized and managed in a distinct way to tap in on the opportunities arising from the growing demand of telecom infrastructure in the country.
- (ii) Thus, the Demerger is expected to lead to following benefits:
 - (a) allowing respective businesses to create a strong and distinct platform which enables greater flexibility to pursue long-term objectives;

- (b) better alignment of the respective businesses to its customers and to improve competitiveness, operational efficiencies and strengthen its position in the relevant marketplace resulting in a more sustainable long-term growth and competitive edge;
- (c) enabling accelerated growth of ONB and allowing the GSB to explore suitable strategies to fund its growth plans;
- (d) creation of an independent company focusing exclusively on GSB and exploring opportunities in the said sector. The independent company can attract different sets of investors, strategic partners, lenders and other stakeholders having a specific interest in the GSB;
- (e) the Demerger and consequent issue of equity shares by the Resulting Company are proposed to allow shareholders of the Demerged Company and investors to invest in the distinct key businesses and allow shareholders to unlock the value of their investments;
- (f) dedicated and specialized management focus on the specific needs of the respective businesses.
